OUR SERVICE

Since 1995 we are specialized in the handling of on-board courier (OBC) shipments. Our services are professional and "all inclusive" and even can be used, if conventional logistic routes are not available. With our service you keep your delivery schedule on time and avoid any production cut-offs.

We see ourselves as a service partner for freight forwarders and the industry. We offer a variety of transportation solutions for your urgent shipments. You have to act immediately? No problem, we offer you an individually tailored 24/7- to-your-needs on-board courier solution.

Our couriers are everywhere and always ready to pick-up your shipment and accompany it personally to the destination airport or directly to the consignee. We move nearly everything from single documents to large number of pieces or higher weights. We take care of all organizational tasks and deliver door to door.

- Fastest possible transport as OBC
- AOG and spare parts logistics
- pick-up service all over Europe
- Economic routings

- Frequent flyer status of all our couriers
- OBC Service to/from China and India
- Transport insurance
- Custom clearance

- Personal delivery to the consignee
- Permanent tracking of all shipments
- Real 24 hours / 7 days service
- Repacking if necessary

OUR ON-BOARD COURIER

The majority of our OBC shipments comes from the automotive sector. Especially in this industry "just in time" is a MUST to avoid production delays and cost intensive stops. We see ourselves as a direct link between suppliers and manufacturers.

In particular for the automotive industry and their suppliers, we handled in the past few years thousands of OBCs on our "race tracks" in the United States (Greenville, Tuscaloosa) as well as to South Africa and Mexico.

Take advantage of our AOG and Marine parts logistics to avoid cancellations and/or unnecessary waiting time and cost. With our on-board courier we are able to ensure a smooth operation and production flow.

When every minute counts we are there.

Also for the carriage of samples or prototypes on-board courier service is often used.

Our couriers regularly take care of valuable and sensitive computer or semiconductor parts to move them safely and in time to their destination.
